When using both A.C. and Alt. Brackets, belts can be run either of two ways - as shown. They will require the use of 2 groove crank and water pump pulleys. Routing the belts as shown in Diagram 2 - will allow clearance for small blowers and extra room for T.P.I. air cleaners. The long belt will be approximately 70-71". As with any mount system, assemble all of the brackets to engine BEFORE TIGHTENING THE BOLTS.

As with any part of this nature, make sure it fits your application before painting or plating. Parts that have been painted, plated, or modified may not be returned.
